*On construction projects, my job is to run the day-to-day operations on the construction site and control the short-term schedule. My role also includes important quality control and subcontractor coordination responsibilities. Plus dealing with all the municipalities, neighbors, suppliers and possible historical sites. I have been in the construction industry since 1975 and joined Saunders in 1986.*

*As a superintendent, I worked on several tilt-up, education, office building, laboratory and educational facilities including the Renaissance Charter School, Koll Centennial Center, and Cherry Creek Business Center. I supervised construction on the Johnson Storage and Moving facility and Classic Residence by Hyatt. I completed the 210 University remodel of elevator lobbies, rest rooms and tenant space along with exterior landscape. I also worked on a 5 story aloft hotel in Broomfield with retail space, pool and excersize areas, and site work. **I have extensive experience in all phases of construction and building types which include Residential, Commercial, and Industrial.***
